\$ST is a terminal feeder profit index expressed in dollars per head used to rank beef sires. \$ST utilizes genomic breeding values for growth, Feed Conversion Efficiency, and carcass traits from STgenetics® comprehensive Beef on Dairy progeny testing program to represent the expected dollar-per-head difference in profit potential of Beef on Dairy calves from 400 lbs. to finish.

TOP \$ST SIRES

NAAB	NAME	REG #	\$ST

551AN01830	ELECTRIC	20238981	248
551AN01881	BIG SPREAD	20464616	227

\$ST = CARCASS REVENUE - PRODUCTION COSTS

Carcass Weight X Grid Value

\$ST=153

Feed Cost + Yardage + Production Costs

\$ST=285

Bull B's \$ST of \$285 indicates that on average, progeny of Bull B would have a \$132 (\$285-\$153) per head profit advantage across the feeding period compared to progeny of Bull A.

\$ST PERCENTILE VALUE: 1% - \$250 | 5% - \$179 | 10% - \$147 | AVERAGE = \$34

A premier index designed to increase profitability and sustainability by reducing feed costs and decreasing the carbon footprint of cattle.

Ecofeed®

A WINNING
SOLUTION FOR
PRODUCERS &
CONSUMERS!

The greatest potential for improving profitability and environmental sustainability is to select animals that produce the same amount of milk or meat on less feed.

Ecofeed® enables producers to positively impact an animal's carbon footprint prior to birth and reduce the input cost of beef production.

CREATE REPLACEMENTS & BUILD BACK YOUR HERD FASTER!

STrategy is a whole herd breeding approach using gender control. Using sex-sorted semen you can create the progeny your herd needs, while generating the productivity and profitability you want.

USE BULLS THAT EXCEL FOR TERMINAL TRAITS IN SEXED MALE

GENDER CONTROL USING **Sexed Male**

Use Ultraplus™ Male semen to make market steers using your choice of one terminal sire. These steers excel for rapid growth, feed conversion, carcass quality, and profitability.
